DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alice Y. Choy on July 22, 2004.

The application has been amended as follows:

In the claims:

Cancel claims 57-98.

Allowable Subject Matter

2. Claims 1-56 are allowed.
3. The following is an examiner's statement of reasons for allowance:
 - a. With respect to claim 1, the claim has been found allowable over the prior art because the prior art fails to teach or fairly suggest a method of conducting a dimensional (D) G-matrix Fourier transformation (GFT) nuclear magnetic resonance (NMR) experiment, wherein N is the dimensionality of an N-dimensional (ND) Fourier transformation (FT) NMR experiment and K is the desired reduction in dimensionality relative to N, said method comprising the steps of: independently cosine and sine

Art Unit: 2859

modulating NMR signals detected enabling phase-sensitive sampling of all indirect chemical shift evolution periods; and transforming the NMR spectra into D phase-sensitively edited spectra wherein the 2^K chemical shift multiplet components of the NMR spectra are edited to yield phase-sensitively edited NMR spectra having individual chemical shift multiplet components in combination with the remaining limitations of the claim.

b. With respect to claims 2-56, the claims have been allowed due to its dependency on claim 1 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO 892 discloses MR systems and methods that includes chemical shifts evolution.
